

**Petroleum Carrier Information Return –
Exceptions Code List Version 6 - 2009**

Error output Format: Error Number, Schedule, Product, Doc Number, Field Name and error value.

1. Error Number - Unique number identifying exception.

- Messages prefixed with “EXX” represent errors. Errors must be fixed before the Department can process your file.
- Messages prefixed with “WXX” represent warnings. Warnings will not stop the Department from processing your file. Upon notification, the Department may convert warnings to errors.

2. Schedule – Receipt or disbursement schedule where error or warning is located.

3. Product – Product type associated with error or warning.

4. Doc Number – Identifying number posted in column 8 (schedule of receipts) or column 9 (schedule of disbursement) of your return. Doc Number identifies the line where the error or warning is located.

5. Field Name - Schedule header information where the error or warning is located.

6. Error Value – Schedule detail creating error or warning.

Error output Format (Generic): Error #, Schedule, Product, Doc Number, Field Name and error value.

Example: Error Message – Not a Valid license Number (All except Return Header)

Schedule -14A
Product – 124
Doc. Number - 24731
Field Name - Seller’s FEIN
Error Value - “651234567”

Example: Error Message – Not an active Carrier License Number (Return Header)

Field Name - Seller’s FEIN
Error Value - “651234567”

Generic Data Integrity Error Message (All Schedule Data/Header Fields)

- (E702) **Invalid Document Format Error Message** – Exceeds 15 characters or non alphanumeric characters are present within the body of the return data. Example.....”~” and “^”.
